</> PROJECTS

<u>Analyze Regional Disability of Philippines</u> - Developer
- Built a **web-based data visualization app** using Python and Streamlit to analyze functional difficulty trends among Philippine households (2006–2015).
- Created **interactive choropleth maps and charts** to highlight PWD distribution patterns and support policy insights aligned with RA 7277 & RA 10754.

<u>Work Force Attrition</u> – Developer
- Analyzed employee feedback using **MySQL, Power BI, and Excel** to identify key drivers of low tenure and disengagement, delivering actionable insights to support data-driven HR decisions.

<u>Catsu Dormitory Management System</u> – Developer
- **Developed a Dormitory Management System using Laravel Livewire and AdminLTE to support university housing operations**.
- Enabled management to track resident students, process and approve dormitory applications, and monitor student contract durations

<u>Ego Inventory System</u> – Developer:
- Developed a **Laravel & Livewire-based inventory system** for a multi-category retail business.
- Implemented **role-based access, real-time tracking, audit logs, and low-stock alerts**.
- **Deployed and maintained in production on Hostinger** with remote access for managers.

Secondhand Bike Online store
- Built a **Laravel & Livewire-powered C2C bike marketplace** with reactive UI and advanced filtering.
- Implemented **user-generated listings** and direct buyer–seller interaction.
